

Shaping the Future - Intel's Academic Collaborations

Sowmya Venkataramani (Intel Corporation)

Intel is dedicated to shaping the future by investing in the next generation of innovators through academic collaborations and workforce development initiatives. This talk will provide an in-depth look at Intel's comprehensive approach to cultivating talent within the semiconductor industry, with a particular focus on the Intel Semiconductor Education and Research Program (SERP) for Ohio.

We will explore Intel's multifaceted strategy that encompasses partnerships with educational institutions, targeted training and experiential learning programs, and direct community engagement to address the growing demand for skilled professionals in the semiconductor field. The presentation will highlight the successes and learnings from the SERP, which serves as a model for how industry and educational institutions can collaborate to create a robust pipeline of highly trained workers.
